

# FARM IMPLEMENTS (INDIA) PVT. LTD

NEW GENERATION  
FARM MACHINES

TECH <2> FARMS

## about us

### Small Beginning !

We are the pioneers in introducing state – of – the art, Tractor P.T.O. operated machines to suit Indian farmer's need. Our Company was started in 1984. We started with the product "ROTAVATOR".

### Different products!

Through our wide Dealership Network, we have been supplying the machines and have already made our existence in the whole Indian market. At present we have different products like Hole Digger, Rotaslasher, Baler, Shredder, Power Harrow, Bund Former, Drive Harrow for exclusive paddy field, Subsoiler, Tea Harvester, Cassava Planter/Harvester, Bio Mass equipments / Tea Garden equipment etc. to offer, interestingly all are unique.

Thus we bring in New Technology <2> Farmers. Apart from Indian Market, our products are exported to other countries also.

### Quality Policy

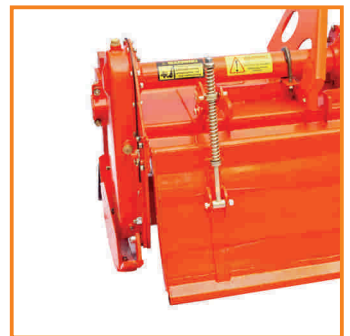

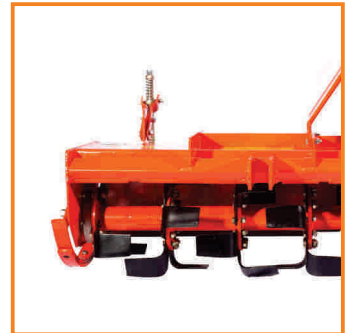

Farm Implements (India) Pvt. Ltd. is committed to meet and exceed the customer Satisfaction and Quality of Service every time through Continual Improvements of Quality management System.

In addition, We are committed to develop, introduce, manufacture and supply of Innovative Agriculture and Horticulture machines to the farmer for efficient & effective Farm Mechanization by applying the Knowledge, Skills and technologies.

CASSAVA PLANTER	9
FOLDING WING ROTARY MOWERS	10
RATOON MANAGER	11
SUBSOILER	12

# ROTAVATOR

ROTAVATORS are best suitable for both dry and wet field operations. Rotavator requires NO TRACTION, the tractor and rotavator combination commence cultivation much sooner after rain than other implements. HOWARD BRAND ROTAVATORS with 24,30,36,42,48 blade arrangements are available. The rotavator is suitable - from 15 hp mini tractor to 80 hp tractors with appropriate working width. Special rotavator are available for exclusive wet field – like banana crop, etc.

For professional use in orchards and general tillage.

# ROTAVATOR RICE HARROW (ROTO PUDLER)

RICE HARROW (ROTO PUDLER) is a combination of Rotavator and perfect levelling device and suppresses the weed which is highly recommended for Paddy field using Paddy transplanter. Tractor pto operated (540 rpm) Implement. RICE HARROW is recommended for wet field which is going to be transplanted with mechanical transplanter.

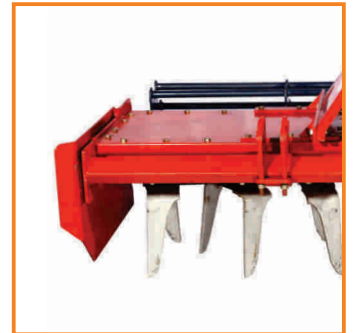

It gives perfect levelling.  
Required medium Hp tractors only.  
Wider coverage 7-11 ft. High Productivity.  
Fuel saving and less maintenance.  
Less Time of operating with minimum water.

ensures high stability, optimal connection with the tractor and troublefree operation.

# POWER HARROW HK10

A rotary power harrow, or simply POWER HARROW, has multiple sets of vertical tines. Each set of tines is rotated on a vertical axis and tills the soil horizontally. The result is that, unlike a rotary tiller, soil layers are not turned over or inverted, which is useful in preventing dormant weed seeds from being brought to the surface, and there is no horizontal slicing of the subsurface soil that can lead to hardpan formation.

Power harrow is highly useful in thorny / stony fields.

Power harrow for medium HP tractors

# ROUND BALER TAKAKITA

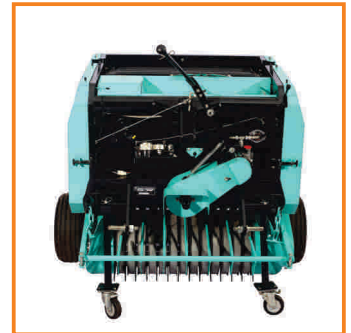

RB510 / RB510W ROUND BALER – is a Tractor PTO operated (540rpm) attachment. This baler is useful in collecting the straw (Harvested by manually or Harvester Machine) from the field, compresses it to round shape and eject it automatically.

Baler covers about an acre per hour, depends on the field size/shape.

Less Maintenance cost.

Very economical in operating cost.

Convenient for transportation.

Low high density formation is possible by horsepower & It corresponds to also day agriculture and technology standard automatic hitching.

Collection of pasture, rice straw, wheat straw.

# BUND FORMER MACHINE

BUND FORMER/LEVEE PLASTERING MACHINE is a boon to the farmer where rat menace and seepage of water is a perennial problem. It makes a perfect bund which will reduce the damages occurred due to rat, water leakage etc. By using bund former equipment will get proper size and perfect cemented shape bunds. With this equipment with lesser operating cost higher number of bunds forming is achieved.

Bund Former is easy to operate.

Bund Former is a Implement to rebuild the existing bunds of the field.

This process of Rebuilding /will eliminates Rodents and burrows.

Saves the loss of water in the rice field.

Reduces the damage occurred by rodents to the crops.

With this equipment with lesser operating cost higher number of bunds forming is achieved.

# ROTASLASHER

ROTASLASHER is a Tractor PTO operated equipment. It will help in providing a green carpet without disturbing the soil. Highly useful in Public gardens, Zoo, Airport runways sides, School play grounds, Golf club and Palm oil fields. Available sizes are 3 ft, 4 ft and 5 ft width.

Rotaslasher for maintaining green carpet.

# CASSAVA PLANTER

DOUBLE ROW CASSAVA PLANTER is attached to normal tractor with the 3 point linkage. The space between the row to row is as per standard requirement. The planters are easy to operate and very easy to maintain.

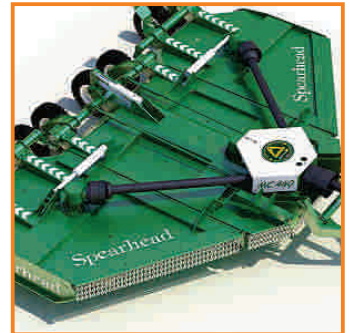

Reduction of labour costs  
Save time  
Higher precision and quality  
Higher yields (ton/ha)

Better uniformity in stakes length and depth, distance between rows, fertilizer rate (kg/ha).

# FOLDING WING ROTARY MOWERS

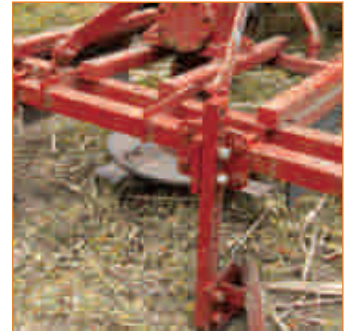

FOLDING WING ROTARY MOWER is tractor drawn pto operated equipment will cover larger areas in limited period which highly useful in places like airports etc. Our folding wing rotary mower are used to cut the grass in systematic manner, which looks so attractive. These folding wing rotary mower are highly demanded in the market due to their significant features such as easy to handle, easy to operate, save lots of time, least maintenance and longer service life.

Impressive productivity follows and in a full day it is perfectly reasonable to cut over 200 acres.

# RATOON MANAGER

RATOON MANAGER is an equipment attached to a tractor and operated by tractor pto. Ratoon manager will manage the ratoons in the sugar cane field after harvesting. The ratoons will be shaved off evenly, off barring the older roots, inter cultivating the soil and earthing up is done in a single pass. Fungicide & fertilizer application in band form can be attached on need basis.

**Cuts cane stubbles at ground level**

**Performs Inter-culture operations**

**Aerates soil structure**

**Reduces total cost of production of Ratoon Sugarcane crop**

Suitable for sugarcane Ratoon Management System.

# SUBSOILER

A SUBSOILER or FLAT LIFTER is a tractor mounted implement used to loosen and break up soil at depths below the level of a traditional ploughing, disk harrow or rototiller. Most tractor mounted cultivation tools will break-up and turn over surface soil to a depth of 15 - 20cm (6-8 in) only while a subsoiler will break up and loosen soil to twice those depths.

Parking Stand  
Shear Bolt Protected Shanks  
One, Two and Three Shank Models  
Simple in Design

Used to loosen and break up soil at depths below the level of a traditional ploughing.
